We are well-reckoned name in the industry engaged in offering Agricultural Consultancy service that suitable is for all kinds of agricultural activities . This consultancy service provides all the guidance and inputs required for the proper growth and development of crops like leafy vegetables, flowers, exotic vegetables, fruits and various plants

OUR VISION

To Develop commercial agro-farms.
To Promote waste land into arable (agricultural) land.
To Boost productions in orchards and agricultural lands.
To provide the real asset and develop the real wealth of farmers– Agricultural lands.
To contribute towards the development of agriculture and agricultural land.
To provide know-how classroom/field trainings to staffs in seeds & fertilisers industries..

OUR MISSION

To provide the most professional state-of-the-art techniques and dedicated service in the food industry and real wealth management to farmers in India.

Our Works

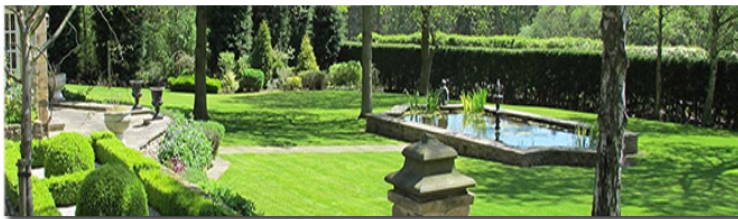

We have acquired immense expertise in offering services on farm planning & other allied services of farm development and management. We abide by flexible and standard approach to investigate the requirements of clients and finally undertake realistic approach to our project planning and design.

Landscape Designing

Our landscape designers are involved in more than just enhancement recommendations. Designers work with our field teams to help bring great results to you through "CustomCare". CustomCare is the tool we use to coordinate our services with you.

Annotated maps and aerial photos of your site are used to manage every area of landscape service, and this is shared with our office and field staff at all levels in real time. With CustomCare, your priorities and goals are evaluated regularly by our designers, and are consistently in focus for our managers, field crews and for your own internal uses.

Orchard Rejuvenator

The term 'Rejuvenator' means renewal or making new or young again. As applied to the orchard tree it would mean restoring the rejuvenating Aonla Fruit Plant productive capacity of the fruit trees. The meaning of 'Rejuvenation' according to Chamber's dictionary is 'to recover youth character or to grow again'. Obviously, this would apply to those plants which have attained a stage where they are no more profitable from the grower's point of view.

Project Developer

Project developer handles tasks that focus on moving the project along toward a successful completion. Project developer works on connecting now with what should happen next, toward reaching the project's objectives.

Pack House Developer

We provide consultancy guidances for making Pack House structures. In pack house setups we educate the farmers on how to utilise the structure as to grade, wash storage and pack their vegetables & fruits. Along with we use to manage nearby mandi/markets local purchasers on cash basis by that farmers should not face any problem related to selling their produce. beside this whom so ever purchaser visit the pack house they used get proper shed for collection their purchased produced as vegetables and fruits. they use get at a time variety of vegetable and fruits and a single platform.
